JavaScript

Professional Summary

Dynamic Full Stack Web Developer with solid proficiency in JavaScript and the MERN stack (MongoDB, Express.js, React.js, Node.js). Adept at leveraging Generative AI and swiftly adapting to new technologies. Strong problem-solving, collaboration, and up-to-date industry best practice implementation skills.

Projects

e-commerce-application   Live Demo Link   Github Repo Link

React

- Developed a fully functional e-commerce website using React.js, showcasing expertise in frontend development.
- Implemented features like responsive navbar, add to cart, remove from cart, login, and logout pages.
- Utilized db.json and user.json to simulate dynamic user interactions.

travelSite   Github Repo Link

Responsive Web Design

- Created a travel-themed website using React.js, demonstrating proficiency in component-based architecture.
- Implemented user authentication and registration functionalities with proper use of environment files.
- Ensured responsive web design using media queries for an optimal viewing experience.

Semrush   Github Repo Link

HTML5   CSS3   Responsive Web Design

- Developed the Login, Sign Up, Captcha, and Forgot Password pages using HTML5 and CSS3.
- Utilized responsive web design techniques to ensure the application was mobile-friendly and accessible across various devices.
- Focused on achieving high similarity to the original SEMRUSH website, showcasing strong attention to detail and design skills.
- Demonstrated proficiency in HTML, CSS, and JavaScript through the successful implementation of project features.
- Improved coding skills by adhering to best practices in web development and receiving feedback from the Masai School program.
